Changing The Face Of Tech: Ada Developers Academy

EXECUTIVE SUMMARY

- Women represent only 26% of the computing workforce and 11% of senior leadership roles in tech.
- Only 3% of computing professionals are Black and there are zero Black or Latine women CEOs of Fortune 500 tech companies.
- Women's quit rate (41%) in tech is over twice that of men (17%).
- 31% of women feel stuck/unsupported in their careers.

Ada Developers Academy advocates for and supports shifting the culture of tech to be more inclusive of women, gender expansive, BIPOC, and other underserved and disinvested communities, narrowing the gap in one of our most economically prosperous and culturally influential sectors. Through this grant we will scale our in-person and digital learning models nationally. Our goal is to create a self-perpetuating flywheel that brings women and gender expansive people into tech, retains and grows them into leadership roles, and enables them to hire and develop exponentially more women and gender expansive people.
A GIFT OF $1 MILLION will help Ada expand on existing Seattle and Digital campuses to serve 216 students every 6 months.

A GIFT OF $5 MILLION will help Ada add two new markets and serve 324 students across 4 campuses every 6 months.

A GIFT OF $10 MILLION will help open four new markets, serving 554 students at 6 campuses every 6 months and ongoing growth.

Ada Developers Academy engages in partnerships to ensure that not only are our programs 100% tuition-free, but that we give additional to support, the the form of a community-funded 0% interest loan, to our students from low-income backgrounds. These loans covers basic needs for them and their families, which help our students very quickly jump into software development careers and reinvest back into the Ada community.
